Material	50726306
Pedido	7050347677 000020
Entrega	7650484978 000010
Lote	302503
Lote/Canti	1000.000 KG
Total	1000.000 KG
Transporte	00000000000036502

Characteristic Method	Unit	Value	Lower Limit	Upper Limit
Visc. index (acid formic 90%) ISO 307	ml/g	133, 03	129, 00	139, 00
Moisture Content ASTM D6980	%	0, 08		0, 20
Yellow index ASTM E313		-8, 0		1, 0
Contamination INTERNO	-	OK		
Particules Size g/100 granules INTERNO	g/100p	1, 67	1, 65	2, 15

The moisture content characteristic represents the average analysis value of the samples collected the time of packaging.

The moisture content can be influenced by the conditions of transport, storage and storage time. The maximum recommended humidity for processing is 0.2%, however, due to the technical characteristics of the transformation process and the specific material, prior drying of the material may be necessary to provide superior performance during the process and ensure the properties profile of the product material.

Expiry date: 11.06.2050
